(54) Title: VIRTUAL RADIO IN A WAGERING GAME MACHINE

(57) Abstract: The present invention provides in one embodiment a computerized wagering game system has a gaming module comprising a processor and gaming code which is operable when executed on the processor to conduct a wagering game on which monetary value can be wagered. A virtual radio audio module is operable to play one of a plurality of audio programs selected by a wagering game player. The selected audio program is presented to simulate a radio such that playing of the selected audio program may start from a point other than the beginning of the audio track.
